

Sub 2.4  
1 a front and a rear, the front has an opening defining [two] PC card slots for receiving at  
2 least one PC card, the rear has a plug for removeably interconnecting the carrier with a  
3 docking assembly;

4  
5 a fan mounts in the carrier for cooling the carrier; and

6  
7 a PC card device having adapter circuitry mounted on the carrier and electrically  
8 connected with the plug[, the adapter circuitry including at least two PC card slot].

Sub 2.5  
1 (four times amended). A carrier and docking assembly in combination for  
2 removeably interconnecting a PC card device with a computer, comprising:

3  
4 a docking assembly having a pair of lateral sides for fixing the docking assembly in a  
5 memory storage bay, in the lateral sides have rails [having a width of at least 5 1/4 inches to  
6 mount within a 5 1/4 inch type memory storage device bay];

7  
8 a carrier slideably mountable into the docking assembly, the carrier has rails that mate  
9 with the rails of the docking assembly;

10  
11 a fan mounted in the carrier for cooling the carrier;

12  
13 a PC card device mounted in the carrier and being electrically connected with the  
14 docking assembly via the carrier;

15  
16 the PC card device includes two offset slots, one of the slots is a PCMCIA slot and the  
17 other slot is a COMPACT FLASH slot.

1  
2 13. (thrice amended) A carrier and docking assembly in combination for removeably  
3 interconnecting a fan with computer, comprising:

4  
5 a docking assembly having a pair of lateral sides for <sup>fixing</sup> ~~fixing~~ the docking assembly in a  
6 memory storage bay, in the lateral sides have rails [having a width of at least 5 1/4 inches to  
7 mount within a 5 1/4 inch type memory storage device bay configured to be fixed in a bay of a  
8 computer housing,]

9  
10 the docking assembly includes a power connector;

11  
12 a carrier slideably mountable in the docking assembly, the carrier has rails that mate  
with the rails of the docking assembly;
